The diagram illustrates a sorting activity. At the top, a box is divided into two sections: the top section contains a red wavy shape, and the bottom section contains the number 4. A vertical line connects this box to a large central rectangular area. This central area contains several carrots of different colors (blue, red, yellow) and is divided into three sections by dashed lines. A vertical line connects the bottom-left section of the central area to a box divided into two sections: the top section contains a blue wavy shape, and the bottom section is empty. Another vertical line connects the bottom-right section of the central area to a box divided into two sections: the top section contains a yellow wavy shape, and the bottom section is empty.
